

Chevivit® E Selen / E

Liquid supplementary feed for horses

Purpose

Compensation of nutritional vitamin E/selenium deficiency in horses. Sufficient supplies of vitamin E and selenium prevent dystrophic symptoms especially of the skeleton and the heart muscles (stiffness, paralytic symptoms). Chevivit® E-Selen/E improves condition and fertility.

Feeding instructions

2 ml (= 1 pump action = equivalent to 1,000 mg vitamin E and 2.5 mg selenium) per horse per day, directly into the mouth or administered via the feed.

Remark for suitable application

Remove the originally sealed cap and screw the pump dispenser onto the bottle. Shake before use. After fixing the pump dispenser, store in upright position.

Composition

Vegetable oils from coconut and palm kernel, refined fish oil

Contents

Crude protein 0.0 %; Crude fat 94.0 %; Crude fibre 0.0 %; Crude ash 4.1 %.

Additives per litre

Vitamin E as alpha-tocopherol acetate 500,000 mg; Selenium as sodium selenite 1,250 mg.

Storage

Cool and dry

Stability

24 months

Pack size

250 ml, incl. 1 pump dispenser

05/2007
